 $\textbf{1.} \quad \text{This aim of this quiz is to familiarise yourself with vectors and some basic vector operations.} \\$ 

For the following questions, the vectors  ${\bf a}, {\bf b}, {\bf c}, {\bf d}$  and  ${\bf e}$  refer to those in this diagram:

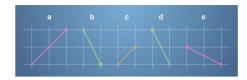

The sides of each square on the grid are of length 1. What is the numerical representation of the vector  $\mathbf{a}$ ?

- $left[2]{2}$
- $\bigcirc$  [1]
- $\bigcirc \begin{bmatrix} 2 \\ 1 \end{bmatrix}$
- **⊘** Correct

You can get the numerical representation by following the arrow along the grid.

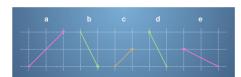

1/1 point

- 2. Which vector in the diagram corresponds to  $\begin{bmatrix} -1 \\ 2 \end{bmatrix}$ ?
  - O Vector a
  - $\bigcirc \ \ \text{Vector}\, \mathbf{b}$
  - $\bigcirc \ \ \mathsf{Vector} \, \mathbf{c}$
  - left Vector  ${f d}$

Correct
 You can get the numerical representation by following the arrow along the grid.

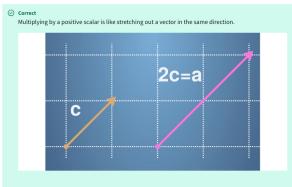

0/1 point

3. What vector is 2c?

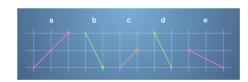

Please select all correct answers.

✓ a

- □ e
- $\square \quad \begin{bmatrix} 2 \\ 2 \end{bmatrix}$
- $\Box \begin{bmatrix} \\ 2 \end{bmatrix}$

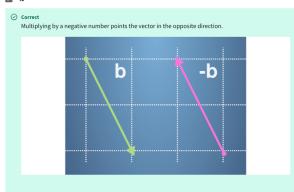

1/1 point

4. What vector is  $-\mathbf{b}$ ?

Please select all correct answers.

✓ d

 $\square \quad \begin{bmatrix} -2 \\ 1 \end{bmatrix}$ 

□ e

 $\begin{bmatrix}
 -1 \\
2
\end{bmatrix}$ 

**⊘** Correct A scalar multiple of a vector can be calculated by multiplying each component.

5. In the previous videos you saw that vectors can be added by placing them start-to-end. For example, the following diagram represents the sum of two new vectors,  $\mathbf{u}+\mathbf{v}$ :

1/1 point

1/1 point

 $\label{thm:continuous} The \ sides \ of \ each \ square \ on \ the \ grid \ are \ still \ of \ length \ 1. \ Which \ of \ the \ following \ equations \ does \ the \ diagram$ 

$$\begin{bmatrix} 1\\1 \end{bmatrix} + \begin{bmatrix} 1\\0 \end{bmatrix} = \begin{bmatrix} 2\\1 \end{bmatrix}$$

$$left[ 2 \\ 1 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} = \begin{bmatrix} 2 \\ 2 \end{bmatrix}$$

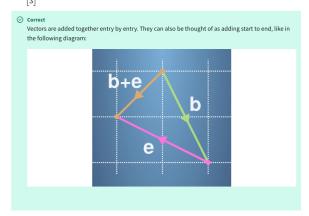

$$\bigcirc \begin{bmatrix} 1 \\ 2 \end{bmatrix} + \begin{bmatrix} 1 \\ 0 \end{bmatrix} = \begin{bmatrix} 2 \\ 2 \end{bmatrix}$$

We can see that summing the vectors by adding them start-to-end and adding up the individual components gives us the same answer.

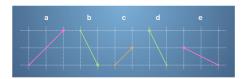

6. Let's return to our vectors defined by the diagram below:

What is the vector  $\mathbf{b} + \mathbf{e}$ ?

- 0
- •
- $\begin{bmatrix} 1 \\ 3 \end{bmatrix}$

1/1 point

- 7. What is the vector  $\mathbf{d} \mathbf{b}$ ?
  - $\begin{bmatrix} 2 \\ -4 \end{bmatrix}$ 0
  - $\begin{bmatrix} 4 \\ -2 \end{bmatrix}$ 0
  - 0  $\begin{bmatrix} -4 \\ 2 \end{bmatrix}$
  - $\begin{bmatrix} -2 \\ 4 \end{bmatrix}$ •
